SECTION Z-18.01 INTENT

It is the purpose of this Article to encourage more imaginative and livable housing environments within Residential (R), Resort-Residential (R-R), Agricultural- Residential (A-R) and Forest-Recreation (F-R) Districts through a planned reduction, or averaging, of the individual lot area requirements for each zoning district providing the overall density requirements for each district remain the same. Such averaging or reduction of lot area requirements, whether for conventional, cooperative or condominium ownership, shall only be permitted when a landowner, or group of owners acting jointly, can plan and develop a tract of land as an entity and thereby qualify for regulation of that tract of land as one (1) complex land use unit, rather than an aggregation of individual buildings located on separate, unrelated lots. Under these conditions, a special use permit may be issued for the construction and occupancy of a planned unit development so long as there is compliance with the standards, procedures, and requirements set forth in this Article.

SECTION Z-18.02 OBJECTIVES

The following objectives shall be considered in reviewing any application for a special use permit for planned unit development:

Z-18.02 (A) To accomplish the objectives of the zoning ordinance through a land development project review process based on the application of site planning criteria to achieve integration of the proposed land development project with the characteristics of the project area.

Z-18.02 (B) To permit flexibility in the regulation of land development.

Z-18.02 (C) To encourage innovation in land use and variety in design, layout, and type of structure constructed.

PROVIDED that the size requirement may be reduced by the Township Board of Trustees to a minimum of fifteen (15) acres if the Board determines that meaningful amounts of open space will be preserved either for residents of the development or residents of the Township in general.

Z-18.03 (B) The planned unit development site shall be located within the R, R-R, A-R or F-R Districts.

Z-18.03 (D) Where the Kankaska County Health Department will approve community type water and sewer facilities, such facilities shall be provided as part of the site development. Package or other treatment systems shall be of sufficient capacity to process the total sewage load of the project.

Z-18.03 (E) The proposed population density of the planned unit development shall be no greater than if the tract were developed with the lot area requirements of the particular zoning district in which it is located subject to provisions of Section Z-13.05(B)(2).

Z-18.03 (F) For each square foot of land gained through the reduction or average of lot size, equal amounts of land shall be dedicated to Boardman Township or shall be set aside for common use of the home or lot owner within the planned unit development under legal procedure which shall also give Boardman Township a covenant or interest therein, so that there are assurances that the required open space shall remain open subject to the provision of Section 13B.6

Z-18.05 (A) Site Acreage Computation: The gross acreage proposed for a planned unit develop shall be computed to determine the total land area available for development into lots under the minimum lot size requirements of the applicable zoning district in which the proposed development is located.

In arriving at a gross acreage figure, the following lands shall not be considered as a part of the gross acreage in computing the maximum number of lots and/or dwelling units that may be created under this procedure:

- 1. Land utilized by public utilities as easements for major facilities, such as electric transmission lines, sewer lines, water mains, or other similar lands which are not available to the owner because of such easements.
- 2. Lands used for commercial purposes exclusive of open lands utilized for golf course purposes.

Z-18.05 (B) Maximum Number of Lots and Dwelling Units: After the total gross acreage available for development has been determined by the above procedure, the maximum number of lots and/or dwelling units that may be approved within a planned unit development shall be computed by subtracting from the total gross area available fifteen percent (15%) of said total for street right-of-way purposes (regardless of the amount of land actually required for street right-of-way), and dividing the remaining net area available by the minimum lot area requirements of the zoning district in which the planned unit development is located.

Under this procedure, individual lots may be reduced in area below the minimum lot size required by the zoning district in which the planned unit development is located, PROVIDED that the total number of dwelling units and/or lots created within the development is not more than the maximum number that would be allowed if the tract were developed under the minimum lot area requirements of the applicable zoning district in which it is located and PROVIDED FURTHER, if the Township Board of Trustees is reviewing the site plan determines that additional density can be justified and will not be inimical to public health, safety and welfare, it may increase the net acreage available for computation by a maximum of the fixed percentage required for street right-of-way purposes.

Z-18.05 (C) Permissive Minimum Lot Area: Notwithstanding other procedures set forth in this Article, per unit lot areas within planned unit developments shall not be varied or reduced below the following minimum standards:

Z-18.05 (D) One Family Detached Dwelling Units: 13,000 square feet without community sewers and Water systems, 10,000 square feet with community sewers and water system.

Z-18.05 (D) Semi-Detached or Attached Dwelling: 12,000 square feet without community sewers and water system; 9,000 square feet with community sewers and water system.

Z-18.05 (E) Townhouse, Row House, or other similar dwelling types: 6,000 square feet without community sewers and water system, 4,000 square feet with community sewers and water system.

Z-18.05 (F) Permissive Minimum Yard Requirements: Under the lot averaging or reduction procedure, each lot shall have at least the following minimum yards:

1. **Front Yard:** Thirty (30) feet for all dwellings PROVIDED that front yard requirements may be varied by the Township Board after consideration of common greens or other common open space if such space provides an average of thirty (30) feet of front yard area per dwelling unit.
2. **Side Yard:** Ten (10) feet on each side for all one and two-family dwellings, twenty (20) feet for townhouses, row houses or other attached dwellings PROVIDED that there shall be a minimum of twenty (20) feet between ends of contiguous groups of dwelling units.
3. **Rear Yard:** Twenty-five (25) feet for all dwellings PROVIDED that rear yard requirements may be varied by the Township Board after consideration of common open space lands or park areas which abut the rear yard area.
4. **Lots or Areas:** designated or used for commercial purposes shall observe the setbacks specified above for residential uses including required parking spaces.

Z-18.05 (G) Maximum lot coverage for principal and accessory buildings and parking shall not exceed forty percent (40%) of the total lot area.

SECTION Z-18.06 OPEN SPACE REQUIREMENTS:

For each square foot of land gained through the averaging or reduction of lot sizes under the provisions of this Article, equal amounts of land shall be provided in open space. All open space, tree cover, recreational area, scenic vista, or other authorized open land areas shall be either set aside as common land for the sole benefit, use, and enjoyment of present and future lot or homeowners within the development, or used as golf course or courses operated either privately or publicly, PROVIDED under all circumstances the use of the course or courses is available to all existing or future residents of the development on an equal basis with all other users, or shall be dedicated to Boardman Township as park land for the use of the general public.

Z-18.06 (A) MINIMUM OPEN SPACE REQUIREMENTS: Each planned unit development must devote a minimum of twenty-five percent (25%) of the planned unit development site to permanent open space. "Open Space" does not include parking lots, roads, and public rights-of-way, but may include flood plain areas and wetlands up to a maximum of twenty-five percent (25%) of the required open space.

Z-18.06 (B) MAINTENANCE OF OPEN SPACE: The Township Board shall utilize one (1) of the following options most appropriate as part of its approval of a special use permit for a planned unit development:

1. That open space land shall be conveyed by proper legal procedures from the tract owner or owners to a homeowner's association or other similar nonprofit organization so that fee simple title shall be vested in tract lot owners as tenants in common, PROVIDED that an open space easement for said land be conveyed to Boardman Township to assure that open space land shall remain open. Land to be utilized for golf courses may be leased for development PROVIDED in the event the golf course is abandoned at any future time, lands utilized for gold course purposes shall revert as common open land.
2. That open space land shall be dedicated to the general public for park or recreational purposes by the tract owner or owners, PROVIDED that the access to and the characteristic of said land is such that it will readily available to and desirable for public use, development and maintenance.

The Township Board shall require that in the event a golf course or open space is abandoned to any future time, lands utilized for golf course purposes and/or open space shall revert as open common land by a homeowners' association unless the Township shall elect to have the said lands dedicated to the Township for use as public park.

It is the intent of this Section that in cases where option (2) above is determined to be in the best interest of the community, the owners or developers of the planned unit development shall not be compelled or required to improve the natural condition of said open space lands.

If the roads and/or streets within the planned unit development are to be a part of the county road system, prior to acceptance by the Board, the developer shall convey the road

right-of-way, by warranty deed or dedication agreement, to the Board of County Road Commissioners of Kalkaska County.

If the road and/or streets within the planned unit development are not to be a part of the county road system, but intersect with, or connect to, an existing public road or street, a permit, including applicable fee, is required from the Kalkaska County Road Commission.

SECTION O-12.01 PURPOSE

Ordinance prohibiting marihuana establishments under initiated law 1 of 2018, the Michigan regulation and taxation of marihuana act.

SECTION O-12.02 FINDINGS

O-12.02 (A) On November 6, 2018, Michigan voters approved Initiated Law 1 of 2018, known as the Michigan Regulation and Taxation of Marihuana Act (“MRTMA”). Among other things, the MRTMA makes marihuana legal under state and local law for adults 21 years of age or older, makes industrial hemp legal under state and local law, and controls the commercial production and distribution of marihuana under a system that licenses, regulates, and taxes the businesses involved.

O-12.02 (B) Section 6 of the MRTMA authorizes a municipality to completely prohibit or limit the number of marihuana establishments within its boundaries. A “marihuana establishment” under the MRTMA means a marihuana grower, marihuana safety compliance facility, marihuana processor, marihuana microbusiness, marihuana retailer, marihuana secure transporter, or any other type of marihuana-related business licensed by the Michigan Department of Licensing and Regulatory Affairs.

O-12.02 (C) The Township has considered the potential benefits, challenges, and costs of permitting marihuana establishments within its boundaries and has determined that prohibiting marihuana establishments is in the best interest of the public health, safety, and welfare.

SECTION O-12.03 PROHIBITION ON MARIHUANA ESTABLISHMENTS.

Pursuant to Section 6 of the MRTMA, the Township prohibits marihuana establishments within its boundaries.

ARTICLE O-FOURTEEN – SOLAR AND WIND ENERGY

SECTION O-14.01 LEGISLATIVE HISTORY

Michigan law required that electric providers achieve a renewable energy portfolio credit of at least 15% by 2019/2020. Under M460.1028, electric providers must meet these requirements by either generating electricity through renewable energy systems or by purchasing renewable energy credits from other providers. In addition to these statutory requirements, many energy producers are eager to achieve even higher rates of energy production through renewable energy sources.

The Michigan Zoning Enabling Act requires that a zoning ordinance shall not have the effect of totally prohibiting the establishment of a land use within a local unit of government in the presence of a demonstrated need for that land. Unless a location does not exist in the local unit of government where the use may be appropriately located. (MCL 125.3207) While solar and wind energy are clearly lawful land uses, Boardman Township will consult its own attorney regarding proof of a demonstrated need.

The siting for wind energy systems and solar energy systems in Michigan lies with the local level of government.

SECTION O-14.02 ACCESSORY USES

Boardman Township allows accessory uses of Solar and Wind Energy systems.

A permit is required and if determined by the Zoning Administrator and the Planning Commission, such permit will be granted. If a special permit is required that process will be followed.

SECTION O-14.03 COMMERCIAL LEVEL UTILITY, SOLAR, OR WIND PROJECTS WILL NEED A SPECIAL USE PERMIT.

O-14.03 (A) For Commercial level (utility grid) Solar projects the following will need to be addressed:

1. Screening, setbacks, decommissioning bond, security fencing, allow or not allow use in Agricultural districts, farmland preservation implications, master plan compliance and avoid spot zoning.
2. For Commercial level wind energy projects should consider: noise, how sound is measured, shadow flicker, electromagnetic interference, Federal Aviation Administration lighting requirements, fire/public safety issues, wildlife impact, property value impact (if any), setbacks, economic benefits or costs, allowing use (or not) in agricultural districts.

SECTION O-14.04 ADDITIONAL CONSIDERATIONS

1. Boardman Township will seek assistance of a planning consultant or other professional that has experience in solar and /or wind energy systems.

2. The Township Board will adopt an escrow fee policy prior to the acceptance of any special use application to cover the township's costs of processing the special use application and to pay for sound consultants, engineers, attorneys, and planning consultants to assist in review of such project.
